JULY 2023

Save Energy in Your Home While on Vacation

It's summer, Lisa!

Whether it's for a family road trip, a beach getaway, or a city adventure, July is a popular time of year for travel. However, while you're away from home, it's important to consider ways to conserve energy and reduce your environmental impact. With a few simple energy-saving tips, you can enjoy peace of mind on your vacation while also embracing a more sustainable lifestyle.

Did You Know?

Follow these five easy energy efficiency tips to reduce your carbon footprint and save on your energy bills while away from home:

1. **Unplug your electronics:** Many devices consume energy even when they're off. If you don't want to pay for that extra energy use while you're away, unplug them! This may include things like your wifi router, TV, computer, printer, microwave, toaster, and coffee maker.
2. **Adjust your thermostat:** If you have a smart thermostat, set it to vacation mode so it knows you're away. If you have a standard thermostat, you can turn up the temperature setting to 85-90 degrees to reduce home cooling costs while you're gone.
3. **Turn off lights or use timers:** Don't forget! Turn off all your lights before you leave the house. If you want to leave a few lights on as a security measure, make sure they are LED and install timers if you can.
4. **Make your home as dark as possible:** Keep your home cooler by drawing the curtains and lowering the blinds to block the sun and reduce radiant heat while you're away.
5. **Keep your refrigerator full:** A full refrigerator is more energy efficient because it keeps items cooler and uses less energy. The extra space on your shelves can be filled with jugs or pitchers of water.
6. **For More Tips Visit [Save on Energy](#).**

Before you go!

Don't have a smart thermostat yet? Love your smart thermostat and want to see what else is available to help you save energy and improve your home's performance? Visit our marketplace [here](#) and check out additional products that can save you energy!
