

PG&E 2020 Comfort Improvement Rebates

- Must do minimum of 4 measures, 2 of which are a shell measure and 1 HVAC measure.

Measure	Prerequisites	PG&E Service Provided	Customer Incentive
Shell - Wall insulation	None	HVAC: Electricity and/or Gas	\$300
Shell - Attic Insulation	R-44 or better. Existing insulation may qualify	HVAC: Electricity and/or Gas	\$300
Shell - Floor insulation	None	HVAC: Electricity and/or Gas	\$300
Shell - Whole building/envelope air sealing and Ventilation	Air sealing can provide many benefits including improved comfort, improved indoor air quality, lower energy bills, and fewer condensation problems.	HVAC: Electricity and/or Gas	\$200
	1) 15% building leakage reduction (pre vs. post) 2) 30% building leakage reduction (pre vs. post)		\$300
HVAC or Shell - Replacement Ducts and Duct Insulation	Replacement of existing systems only. Up to 2 systems (total) per home.	Electricity and/or Gas	\$500
HVAC or Shell – Seal Ducts to 5% Leakage or less	Existing ducts must have 10% leakage or greater at Test-In to be eligible.	Electricity and/or Gas	\$300
HVAC or Shell – Seal Ducts to 10% Leakage or less	Existing ducts must have 20% leakage or greater at Test-In to be eligible.	Electricity and/or Gas	\$200
HVAC – Right-Size Return Duct(s) and Filter/Grille	Up to 2 returns (total) per home.	Electricity and/or Gas	\$100
HVAC – Deep-Buried Duct Insulation	Bonus measure available in projects that both replace or seal duct systems and install R-44 attic insulation. Existing systems must be sealed to 10% duct leakage or less.	Electricity and/or Gas	\$100
HVAC - Cooling	Split AC or Packaged AC. Up to 2 HVAC systems (total) per home. Must have existing central AC.	Electricity	\$300
HVAC - Heating	Sealed Gas Furnace or Heat Pump. Up to 2 HVAC systems (total) per home.	Furnace: Gas	\$500

	Must have existing furnace, electric resistance heater, or heat pump.	Heat Pump: Electricity	
HVAC - Ultimate Comfort	Advanced HVAC installation method, typically resulting in higher energy/cost savings, increased equipment life, and increased home comfort. 1 qualified system rebate measure per home.	HVAC: Electricity and/or Gas	\$500
HVAC - Smart Thermostat	ENERGY STAR certified Smart Thermostats. Must be Wi-Fi enabled. Up to 2 (total) per home with corresponding HVAC system(s).	HVAC: Electricity and/or Gas	\$100
ACCA 4 Assessment and Coil Cleaning (Maintenance)	Detailed system diagnostic testing which includes checking the filter and verifying the unit is performing as expected.	HVAC: Electricity	\$40
Refrigerant Charge Adjustment (Maintenance)	Set the correct refrigerant charge level to your system to maximize its efficiency. Requires completion of the ACCA 4 Assessment.	HVAC: Electricity	\$50
Efficient Fan Delay Control (Maintenance)	Install an efficient fan delay to capture cool air left in your system after the A/C has turned off. Requires completion of the ACCA 4 Assessment and must be an approved model listed by the Program.	HVAC: Electricity	\$70
Blower Motor Replacement (Maintenance)	Replace your outdated motor with new technology for significantly improved efficiency and cost savings. Requires completion of the ACCA 4 Assessment and must be an approved model listed by the Program.	HVAC: Electricity	\$250
Natural Gas Storage Water Heater	Up to 2 water heaters (total) per home.	Gas	\$300
Condensing Natural Gas Storage Water Heater	Up to 2 water heaters (total) per home.	Gas	\$500
Electric Storage Heat-Pump Water Heater	Up to 2 water heaters (total) per home.	Electricity	\$500
Pool Pump	Replace a single or two-speed pump with a variable speed pool pump (primary in-ground pool system only; no Jacuzzis).	Electricity	\$500
Indoor Lighting	\$5 per recessed LED retrofit fixture. Up to 25 per home.	Electricity	\$125
Per-Project Maximum			\$3,500
